CLIMATE FOOD PROCESSING APPLICATIONS

100% Room Recirculation

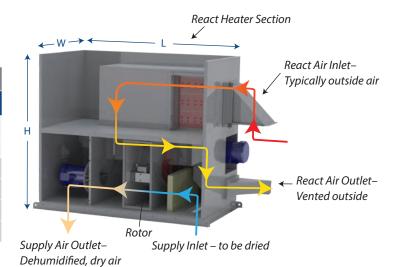

- Remove the latent load from the refrigeration system.
- Accurately control room moisture level independent of temperature.
- Simply draw air from the room, dry and return.
- Control can be as simple as on/off.
 In Critical Process, DDC controller modulates to the load.

⁽¹⁾ Fans rated at standard operating conditions.

Continual engineering and research for product improvement may result in design and specification changes.

Consult sales for certified technical data.

From big to small, we build it all!

If your application needs exceed Dry Climate, CDI also offers large capacity and custom products ranging from 2,000 - 47,000 CFM.

⁽²⁾ Moisture Removal rate based on inlet conditions of 40°F db and 80% RH.

⁽³⁾ Moisture Removal rate based on inlet conditions of 65°F db and 45% RH.

⁽⁴⁾ Actual weights and dimensions to be done during quotation and submittal.
